

THE NCCAOM  
CERTIFICATION IN  
ACUPUNCTURE

# About Acupuncture

The practice of acupuncture in the United States incorporates medical traditions from China, Japan, Korea, and other countries. <sup>1</sup> Acupuncture is one of the essential elements of Oriental medicine and the oldest, most commonly used medical procedure in the world. Originating in China more than 3,000 years ago, the practice of Oriental medicine includes acupuncture, electro-acupuncture, cupping, manual therapies such as acupressure, moxibustion, exercises such as *tai chi or qi gong*, as well as Chinese herbal preparations and dietary therapy. <sup>1</sup>

Acupuncture is the stimulation of specific points on the body, by insertion of very fine, sterile, stainless steel needles to elicit a predictable physiological response. This stimulus may also be administered to the points using mild electrical stimulation (with or without needles), pressure techniques with the hands (acupressure) or the application of heat by various methods.

Acupuncturists assess a patient's syndrome or pattern of disharmony by using a set of diagnostic skills that involve four areas; questioning, palpation, visual inspection, and olfactory-auditory data collection. An acupuncturist determines the necessary treatment principle and strategy to prompt the patient back to functional harmony by discriminating the exact pattern of the body's physiological response to pathogenic factors.

The acupuncturist's skill at determining the appropriate points to treat is based upon his/her ability to accurately distinguish the presenting pattern, knowledge of correct points to address that pattern and knowledge of the proper type of stimulus for each point. The possession of this knowledge and skills is the key distinction between a professional certified acupuncturist and other health care providers who employ acupuncture only as a modality (stimulating points for their general effect without adjusting their choice of points to the specific patient's need).

# Use of Acupuncture

The Institute of Medicine recently identified 79 systematic reviews of acupuncture; placing acupuncture third in usage among all complementary and alternative (CAM) therapies. <sup>2</sup>

Acupuncture has been shown to provide generalized oxygenation and increased blood flow to specific areas of treatment. It also aids production of cortisone and other anti-inflammatory secretions and can increase the internal production of endorphins, the body's natural painkillers. In addition, a 2010 study from the University of Rochester in New York found that acupuncture can help relieve pain by triggering a natural pain-killing chemical called adenosine. <sup>3</sup>

A recent study of acupuncture — the most rigorous and detailed analysis of the treatment to date — found that it can ease migraines and arthritis and other forms of chronic pain. The researchers, who published their results in *Archives of Internal Medicine*, found that acupuncture outperformed sham treatments and standard care when used by people suffering from osteoarthritis, migraines and chronic back, neck and shoulder pain. <sup>4</sup>

A 2006 patient survey from the Alternative Medicine Integration Group based in Florida, found that 94% of study patients being treated by CAM therapies (including acupuncture) agreed that the program treatment helped reduce levels of pain. <sup>5</sup>

# Acupuncture Can Relieve the Following Complaints

The World Health Organization recognizes acupuncture and Oriental medicine as effective for over 43 common ailments including: <sup>6</sup>

## Respiratory Disorders

Sinusitis, Rhinitis

Common cold

Tonsillitis

Sore throat

Hay fever

Bronchitis

Bronchial asthma

## Disorders of the Eyes

Acute conjunctivitis

Myopia in children

Cataracts without complications

Central retinitis

## Mental-Emotional Disorders

Anxiety

Depression

Stress

Insomnia

Addictions

Weight control

## Musculo-skeletal Disorders

Frozen shoulder, Tennis elbow

Low back pain

Osteoarthritis and joint pains

Stiff neck

Tendinitis

Bursitis

Sprains

Injuries from auto accidents

Chronic fatigue syndrome

Fibromyalgia

## Gastro-intestinal Disorders

Acute and chronic gastritis

Hyperacidity

Hiccoughs

Acute uncomplicated duodenal ulcer

Chronic duodenal ulcer (pain relief)

Acute and chronic colitis

Acute bacillary dysentery

Constipation

Diarrhea

Paralytic ileus

### Neurological Disorders

Headache and Migraine  
Dizziness  
Trigeminal neuralgia  
Facial palsy (within 3-6 months)  
Pareses following stroke  
Peripheral neuropathies  
Meniere's disease  
Neurogenic bladder dysfunction  
Nocturnal enuresis  
Intercostal neuralgia  
Sciatica

### Disorders of the Mouth

Toothache  
Post extraction pain  
Gingivitis  
Acute and chronic pharyngitis

### Ear Disorders

Ringing in ears  
Deafness  
Meniere's disease  
Earache

### Reproductive System Disorders

Infertility  
Premenstrual syndrome (PMS)  
Irregular menses  
Menstrual cramps  
Pelvic inflammatory disease (PID)  
Menopausal symptoms  
Morning sickness  
Urinary incontinence  
Impotence

# Is use of acupuncture growing?

The American Hospital Association's Health Forum 2007 Complimentary and Alternative Medicine Survey of Hospitals found that 35% of the hospitals offering complementary medicine provide acupuncture as an outpatient service to the patients. Additionally, acupuncture is represented as one of the top six modalities in both outpatient and inpatient settings amongst those hospitals.<sup>7</sup>

In the United States and abroad, the use of acupuncture and Oriental medicine is gaining widespread acceptance. In the United States there is an estimated 33,000 certified or licensed acupuncturists.

In the past two decades, acupuncture has grown in popularity in the United States. The 2007 National Health Interview Survey conducted by the National Center for Complementary and Alternative Medicine (NCCAM) of the National Institutes of Health (NIH) stated that acupuncture is being widely practiced by thousands of practitioners for relief or prevention of pain and for various other health conditions.

According to the 2007 National Health Interview Survey, the largest and most comprehensive survey of CAM use by American adults to date, acupuncture use has increased between 2002 and 2007 among adults.

In 2007, almost 4 out of 10 adults had used CAM therapy in the past 12 months. Acupuncture is one of the CAM therapies that has seen an increase in usage during this time period.<sup>2</sup>

## Identifying a Qualified Acupuncturist

### How do I find a qualified acupuncturist?

Look for a Diplomate of Acupuncture (NCCAOM)<sup>®</sup> or Diplomate of Oriental Medicine through the NCCAOM<sup>®</sup> *Find a Practitioner* search engine at [www.nccaom.org](http://www.nccaom.org).

The additional designation of licensed acupuncturist (L.Ac.) is awarded by a state regulatory board. Currently, 43 states plus the the District of Columbia, require NCCAOM certification or the passing of the NCCAOM examination(s) as one requirement for a state license to practice Acupuncture and/or Oriental medicine; however, one should always confirm the practitioner has a current state license to practice with the appropriate state board.

## What training does an NCCAOM Diplomate of Acupuncture have?

Comprehensive training in traditional differential diagnosis and proper treatment methods requires that a Diplomate of Acupuncture (NCCAOM)<sup>®</sup> completes three to four academic years of education at the master's degree level in an acupuncture program accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM) or has completed an international education program which is substantially equivalent to ACAOM standards. ACAOM is the only accrediting body recognized by the United States Department of Education as the authority for quality education and training in acupuncture and Oriental medicine. In addition to graduation from an ACAOM accredited program, a Diplomate of Acupuncture (NCCAOM)<sup>®</sup> must demonstrate professional competency by passing NCCAOM certification examinations in Foundations of Oriental Medicine, Acupuncture, and Biomedicine as well as meet other NCCAOM certification requirements. The NCCAOM Diplomate training and competency verification is in sharp contrast to the acupuncture training of other healthcare professionals such as chiropractors or registered nurses or even medical doctors who typically receive 100-300 hours of abbreviated training. These other healthcare professionals provide acupuncture by treating a more limited number of points.<sup>8</sup> Certified (and licensed) acupuncturists are also trained in standard medical history gathering, safety, ethics, common pharmaceuticals and supplements, and recognition of when to refer patients to other health care professionals or consult with other medical practitioners.

# NCCAOM and its Diplomates

The National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM®) is widely accepted as the most influential leader in the field of acupuncture and Oriental medicine. There are currently over 17,000 active NCCAOM Diplomates (NCCAOM certificate holders) practicing under an NCCAOM certification.

The NCCAOM, established in 1982, is a non-profit organization whose mission is to establish, assess, and promote recognized standards of competence and safety in acupuncture and Oriental medicine for the protection and benefit of the public. NCCAOM Acupuncture, Oriental Medicine and Chinese Herbology certification programs are accredited by the National Commission for Certifying Agencies (NCCA). NCCA's standards exceed the requirements set forth by the American Psychological Association and the United States Employment Opportunity Commission. As a requirement of accreditation the NCCAOM must submit annual reports to NCCA and must undergo a full reaccreditation every five years for each of its NCCA accredited programs. Additional information is available at <http://www.credentialingexcellence.org>.

Below are the service marks for the NCCAOM Certification Programs. The highlighted service mark is for the Acupuncture Certification Program.

The NCCAOM Diplomat of Acupuncture, Chinese Herbology, and Oriental Medicine programs carry the NCCA accreditation seal.
