

Numbered Compounds

THE KEY TO INTRA-CELLULAR AND EXTRA-CELLULAR DRAINAGE

Seroyal

UNDA Numbered Compounds:

An energetic journey to wellness and accelerated healing

Epidemic of environmentally mediated diseases

Our world today is overflowing with chemical toxins – with no decrease in sight. Environmentalists and public health experts warn that with increasing exposure and accumulation of toxins within our bodies, we are endangering our health. Rates of respiratory diseases, birth defects and developmental disorders have exponentially increased in recent decades.

Physiology prevails over pathology

The most long lasting and effective way of restoring health to the body, is to work at an intra-cellular and extra-cellular level to remove toxins. By accomplishing this, we help support physiological functions, encouraging the body towards a state of dynamic equilibrium and self-regulation where true healing can begin. Hence, physiology will prevail over pathology.

The theory of Homotoxicology was first outlined by Hahnemann 200 years ago in his book Chronic Disease. Homotoxicology organizes and explains how toxins penetrate and accumulate in the body. It also explains the accumulation of toxins with phases of aggravation and stabilization.

The body has the potential to naturally eliminate toxins – no matter what the state of health. UNDA Numbered Compounds are well-adapted to the theory of homotoxicology, allowing the body to eliminate toxins in a way that supports the body's normal functions of elimination without forcing these processes.

Biotherapeutic Drainage™ is a modality that should be used in every patient to address the underlying cause of the disease – not just the symptoms.

Biotherapeutic Drainage™ versus Detoxification

Elimination is a normal physiological function of the body and one of the four pillars of health (diet, drainage and elimination, psychological equilibrium and balancing of the hereditary characteristics).

Detoxification forces physiological functions which may lead to a *physiological disequilibrium*.

Biotherapeutic Drainage™ works on an extra-cellular and intra-cellular level to remove blockages – toxic accumulations, mental or emotional blocks – helping to *support* physiological functions, encouraging the body towards a state of *dynamic equilibrium* and *self-regulation* where true healing can begin.

UNDA Numbered Compounds in Biotherapeutic Drainage™

Utilizing UNDA Numbered Compounds in Biotherapeutic Drainage™ is key as they work at a physiological level. Any trained practitioner can incorporate UNDA Numbered Compounds into their treatment plans as it enhances the long-term effects of patient treatment. It can also be a stand-alone modality. Furthermore, UNDA Numbered Compounds fit well into the philosophy of individualized medicine, allowing for versatility in treatment approaches.

UNDA Numbered Compounds in Traditional Chinese Medicine

Traditional Chinese Medicine (TCM) specifically describes the terrain of the individual, how to build the energy of the body and how to detoxify the energy by eliminating toxins. UNDA Numbered Compounds can be incorporated into TCM since they were created to act on the terrain and the underlying theory behind the UNDA Numbered Compounds corresponds to the energetic structure of TCM. UNDA Numbered Compounds also help support the normal physiological functioning of the emunctories, organs and homeostatic systems.

Introduction to the UNDA Numbered Compounds

Why use the UNDA Numbered Compounds?

For over 50 years the UNDA Numbered Compounds have forged their place on the world stage of homeopathic complexes for three reasons:

1. Its composition: UNDA Numbered Compounds are complex homeopathic remedies that utilize the organotropic nature of the phytotherapeutic properties of plants to drive pure potentized metal remedies intra-cellularly where they exert their enzymatic metabolic functions to remove and drain both endogenous and exogenous toxins from target organs.
2. The method of administration: The UNDA Numbered Compounds are prescribed according to a structured protocol requiring a synergistic combination of two, three or four of the UNDA Numbered complexes.

The role of the first number is to regulate the general organ system. The second complex regulates the organ's metabolic functions of elimination, detoxification, and catabolism. The third complex has a specific action on the targeted organ or tissue.
3. The UNDA Numbered Compounds are able to respect the specificity of the various reactional modes of the individual – an elementary principle in homeopathy, through their action on the level of the diathesis. The diatheses express themselves through the manner in which toxins are eliminated and whether or not they respect the principles of natural immunity of the individual.

Understanding the UNDA Numbered Compounds

The concept of the UNDA Numbered Compounds encompasses the basis of natural medicine and the fundamental principles of homeopathic medicine, as founded by Samuel Hahnemann:

1. Do no harm
2. The body is capable of self-regulation
3. Physiology prevails over pathology
4. Restoring the individual's physiology is essential to healing their pathology
5. The four pillars of health must also be taken into account with equal value given to: diet, drainage and elimination, psychological equilibrium and balancing of the hereditary characteristics

The strength of the UNDA Numbered Compounds in context with these principles demonstrates their universality and application to all branches of medicine including phytotherapeutic, naturopathic and homeopathic schools of thought.

UNDA Numbered Compounds allow for intervention on all levels of body functions. Restoring of health is assisted by applying one or more of the terrain principles.

The aim of this comprehensive product reference guide is to assist in building more effective and successful patient treatment strategies. The reference guide is to be used as an adjunct to Seroyal Continuing Education and is not intended to be utilized as a diagnostic tool nor replace any other required education. The remedies indicated in this product guide are potent medicines that can have profound therapeutic effects on patients. As with any intervention, the dosage may need to be adjusted for those with chronic conditions, very sensitive individuals and those taking multiple medications. When to use the UNDA Numbered Compounds

1. To encourage Biotherapeutic Drainage™ of a system.

The five stages of drainage:

- Cellular stage:** these toxins are a result of cellular catabolism. Use UNDA 1, if a benign process, and UNDA 13, if a degenerative process.
- Hepatic stage:** the hepatic filter is needed to control the toxins eliminated by the cells that are thrown into the circulation of the blood. UNDA 20 encourages this step.
- Secondary catabolic stage:** all the iatrogenic toxins from catabolic degradation that are interrupted by chemical or dietary toxins require an additional degradation or secondary catabolism. Toxins can only be eliminated by the emunctories after they have been completely catabolized. UNDA 258 for arthritic conditions, UNDA 48 for degenerative conditions, or UNDA 15 for feverish conditions can encourage this healthy catabolic stage.
- Renal and pulmonary stage:** the catabolized acidic toxins are eliminated by the kidneys or lungs depending on whether they are volatile or not. UNDA 2 or 5 will encourage this step.
- Emunctory stage:** Once the toxins have been degraded enough to be eliminated, they are carried by the remedy to the mucous membranes that are capable of serving as primary emunctories. If this elimination is inadequate, the body may use inflammation to force the toxins to be eliminated by the same emunctories.

2. To balance the homeostatic systems:

The endogenous self-regulation of the body is controlled by six homeostatic systems responsible for the equilibrium of the individual. These include the electrolytic system, the enzymatic and hepatic biochemical systems, the immune system, the hormonal system, the circulatory system, and the nervous system. UNDA 2, 1, 3, 10, 8, and 9 are the UNDA Numbered Compounds responsible for managing and balancing these systems respectively.

3. For an efficient natural immunity:

The main action of the UNDA Numbered Compounds is to encourage drainage of endogenous substances that impede biological balance. These actions facilitate the immunological development in the child and strengthen the immune function in the adult.

4. For intervention on functional and lesional pathologies:

By targeting the physiological function of the body, UNDA Numbered Compounds will eliminate the pathology over time.

5. Encouraging the action of the similimum:

With the restoration of functionality and visceral physiology, the similimum will have a more efficient, deeper and quicker action on the level of the terrain.

How to use the UNDA Numbered Compounds

UNDA Numbered Compounds are available in 20ml (0.6765 fl oz) size bottles. They are often prescribed as a combination of two, three or four complexes at a time.

Acute conditions: Five drops of each bottle under the tongue, six times daily. Reduce frequency as improvement occurs.

Chronic conditions: Five drops of each bottle under the tongue three times daily, three weeks out of each month, for three to six months.

Children under 12: Three drops of each remedy in their bottle or in apple juice, six times daily for acute conditions and five drops morning and night for chronic conditions.

UNDA Numbered Compounds are potent medicines that can have profound therapeutic effects. As with any intervention the dosage may need to be adjusted for those with chronic conditions, very sensitive individuals and those taking multiple medications.

In summary, the use of the UNDA Numbered Compounds is compatible with the laws of natural medicine and works in conjunction with the unicist, pluralist, phytotherapeutic or classical practitioner philosophies that support restoration of the natural physiology.

UNDA Numbered Compounds are potent medicines that can have profound therapeutic effects on patients. As with any intervention, the dosage may need to be adjusted for those with chronic conditions, very sensitive individuals and those taking multiple medications. Healthcare practitioners are advised that for optimal patient results, building knowledge and protocol guidelines through Seroyal Continuing Education programs is strongly recommended.

How to use the UNDA Numbered Compounds Synoptic Chart (see page 4)

This UNDA Chart can be used as a guideline to help facilitate the combining of the UNDA Numbered Compounds in developing and visualizing a prescription plan. The application of these UNDA Numbered Compounds is both an art and a science and careful consideration into choosing the correct remedies will assist in balancing patient physiology in order to begin addressing the underlying pathology.

Follow these basic principles when learning how to use this UNDA Numbered Compounds Synoptic Chart:

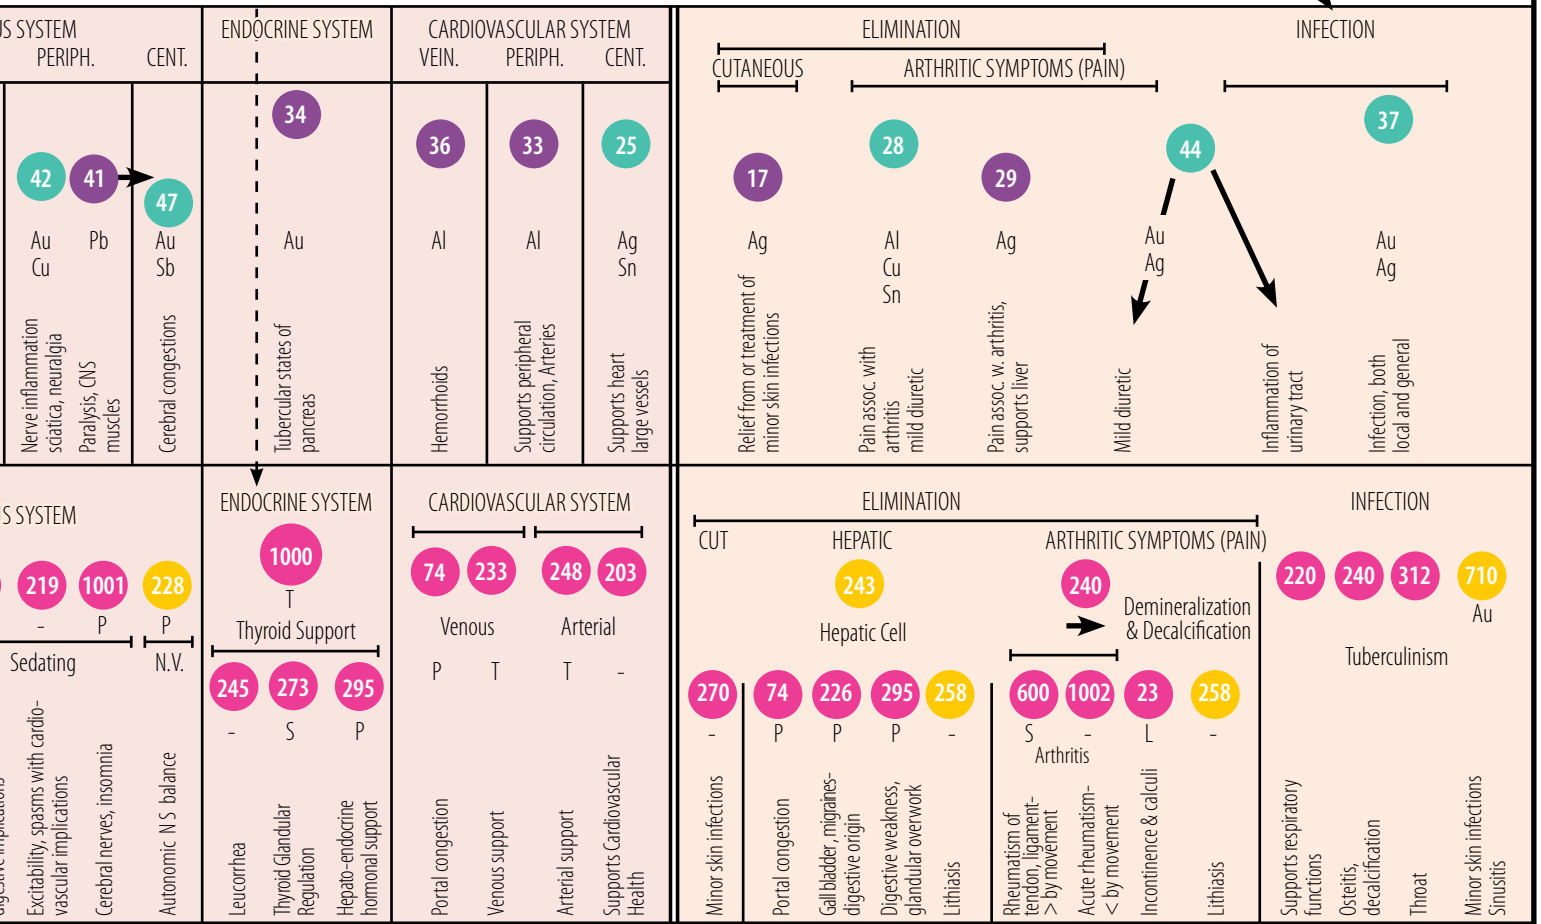

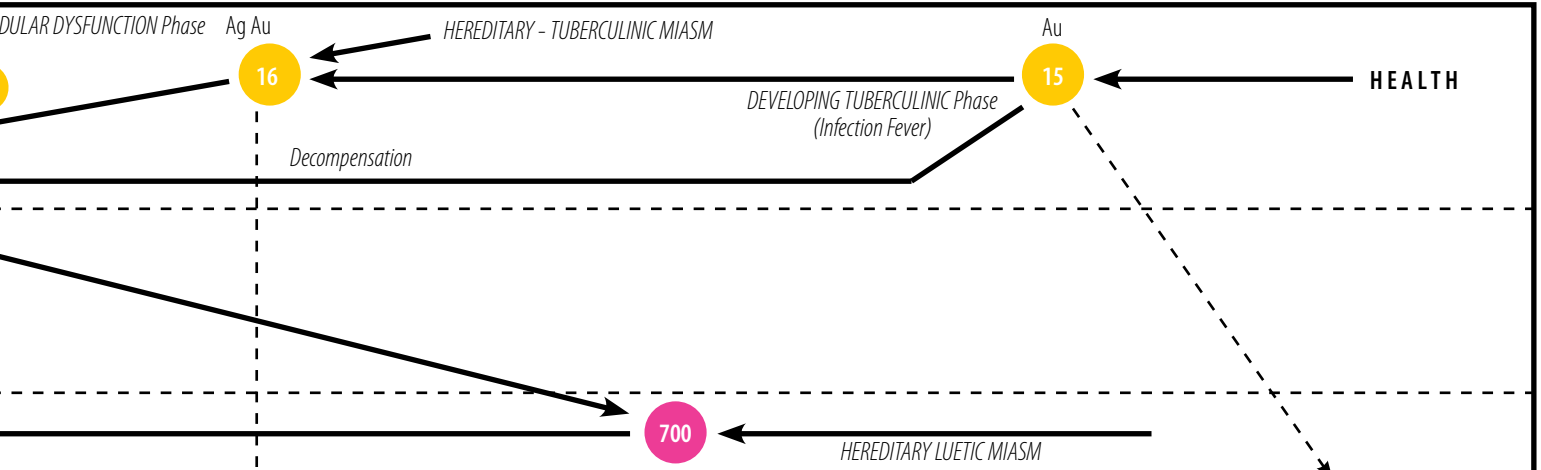

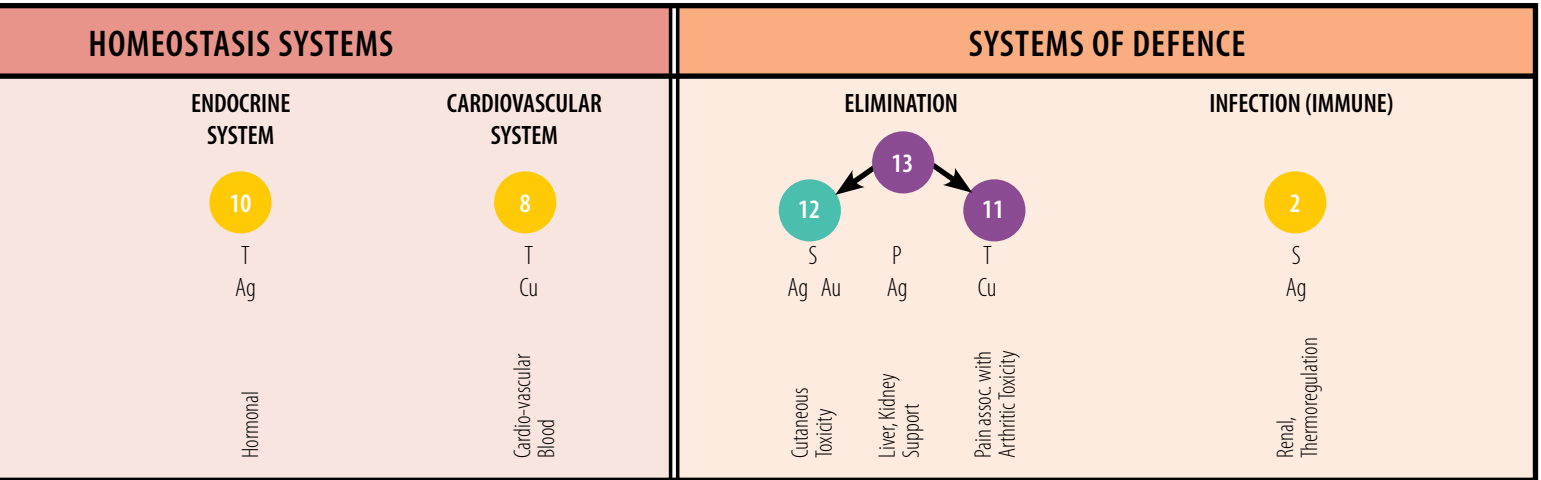

1. Pick one remedy from “The Organs and Deep Structures” box.
2. Pick one remedy from “The Functions” box.
3. Pick one remedy from the “Eliminations” box.
4. Optionally, if work needs to be done on the level of “The Miasms” pick a remedy from this box. Miasms dictate “how” we eliminate our toxins and when our Miasm is not working well we do not succeed in eliminating toxins from the normal routes of excretion. This could be referred to as a patient who is “stuck”. The healthcare practitioner could do all the right things and yet the patient does not get better. By addressing the Miasms, the patient will become “unstuck”.

The idea is to systematically use the UNDA Numbered Compounds so that you follow this pattern to address the issue of “drainage” in the individual. Think about what area of the person’s physiology needs help with toxin removal i.e. what organ structure is not working properly, what functional area needs to be addressed and in which way the individual needs to eliminate their toxins. One does NOT need to pick a remedy in the same organ category for each of the four boxes i.e. you may pick a Kidney remedy for your “Organ” box, a Liver remedy for your “Functions” box and a Arthritic remedy for the “Elimination” box.

What is most important is to take the physiological needs of the patient into account each time the UNDA Numbered Compounds are prescribed. This chart will help increase your understanding and success with these remarkable remedies.

The Purest Homeopathic Source in the World

Established over half a century ago in Belgium, UNDA is renowned for manufacturing exceptional homeopathic products utilized in supporting immune, lymphatic and endocrine systems to properly process and eliminate toxins from the body. In the production of all homeopathic remedies UNDA uses only pure materials and herbs that are biodynamically grown or wildcrafted. UNDA produces a broad range of homeopathic products in various potencies including: the unique Numbered Compounds, Gemmotherapy macerates, Schüssler Tissue Salts, Gammadyn Oligo-Elements, Organotherapy, Plexes, creams and oils, as well as homeopathic compatible dental care.

Schüssler Salts

Schüssler Tissue Salts act on the cellular level to balance and restore cell function. UNDA Tissue Salts are prepared using methods based on Dr. W. H. Schüssler Biochemical System of Medicine (in accordance with the German Homeopathic Pharmacopeia [HAB]).

Plexes

Plex Remedies are condition-specific homeopathic specialties prepared in low dilutions and are recommended for acute and chronic ailments. The product range helps support: the digestive, hormonal, immune, musculoskeletal, nervous, respiratory, skin, oral and vascular systems. Products come in a variety of formats: creams, liquids, lozenges, sachets, spray, gum, paste and dissolvable tablets.

Gemmotherapy

Gemmotherapy uses the extracts of fresh buds, young shoots, rootlets, seeds or saps from developing plants, where the plant's life essence is at its peak in the young growths. UNDA Gemmotherapy remedies are prepared in a natural glycerin and organic ethanol medium, which is then filtered and potentized at a 1/10th dilution (1X Hahnemannian) in a pure water, natural glycerin and organic ethanol medium. These complex remedies are macerated for increased patient compliance. This methodology captures the most complete set of highly-concentrated active constituents necessary for tissue regeneration, favourable growth development and essential drainage properties. UNDA Gemmotherapy facilitates Biotherapeutic Drainage™ and is an excellent adjunct to the UNDA Numbered Compounds.

Gammadyn

Oligotherapy is a method of furnishing the body with the ions it cannot synthesize and which are indispensable for cellular enzymatic functions. This functional therapeutic modality requires the use of trace elements in precisely measured, small doses in a highly bioavailable form. These trace elements are co-factors in a multitude of biochemical reactions where they accelerate the speed of these reactions without ever modifying the important equilibrium that exists and that must reign within the body to maintain optimum health. UNDA Gammadyn Oligo-Elements are: convenient, effective, highly stable, highly bioavailable and great-tasting.
