

THE NCCAOM
CERTIFICATION IN
ORIENTAL MEDICINE

About Oriental Medicine

Oriental medicine, which includes the practice of acupuncture, Chinese herbology and Asian bodywork therapy (ABT), is a comprehensive health care system encompassing a variety of traditional healthcare therapies that have been used for more than 3,000 years to diagnose and treat illness, prevent disease and improve well-being.

About Acupuncture

Acupuncture is one of the essential elements of Oriental medicine. It is one of the oldest, most commonly used healing practices in the world, originating in China more than 3,000 years ago. ¹

The term acupuncture describes a family of procedures involving stimulation of anatomical points on the body by a variety of techniques. American practices of acupuncture incorporate medical traditions from China, Japan, Korea, and other countries. The acupuncture technique that has been most studied scientifically involves the insertion of the skin with thin, solid, metallic needles that are manipulated by the hands or by electrical stimulation. ¹

According to the 2007 National Health Interview Survey, the largest and most comprehensive survey of complementary and alternative medicine (CAM) use by American adults to date, acupuncture use has increased between 2002 and 2007 among adults. In 2007, almost 4 out of 10 adults had used CAM therapy in the past 12 months. Acupuncture is one of the CAM therapies that has seen an increase in usage during this time period. ²

About Chinese Herbology

Chinese herbal medicine is one of the main modalities within the scope of Oriental medicine. Chinese herbology includes use of substances such as plants, roots, minerals and more. Chinese herbology was developed as an integral part of Chinese medicine and is used to re-harmonize imbalances in the body.³

The World Health Organization (WHO) defines herbal medicines to include herbs, herbal materials, herbal preparations and finished herbal products that contain as active ingredients parts of plants, or other plant materials, or combinations.⁴

Chinese formulas are comprised of herbs designed for each individual patient. This special formulation is crucial because these formulas must be delicately composed for the purpose of achieving balance in each disharmonious state of being.

About Asian Bodywork Therapy

Asian bodywork therapy is the third branch of Oriental medicine that involves the treatment of the human body/mind/spirit, including the electromagnetic or energetic field, which surrounds, infuses and brings the body to life, by pressure and/or manipulation.⁵ ABT uses traditional Asian techniques and treatment strategies to primarily affect and balance the energetic system for the purpose of treating the human body, emotions, mind, energy field and spirit for the promotion, maintenance and restoration of health.⁵

ABT is noninvasive and does not require the use of needles, which is the ideal therapy for children and those who are apprehensive about receiving acupuncture treatments. Many Asian medicine practitioners use acupressure and other ABT therapy methods instead of acupuncture for these patients with excellent results. ABT also does not require the patient to disrobe unlike Western massage, making it suitable for all cultures and religious backgrounds.⁵

Oriental Medicine Can Relieve the Following Complaints

The WHO also recognizes acupuncture and Oriental medicine as effective for more than 43 common ailments including: ⁶

Respiratory Disorders

Sinusitis, Rhinitis
Common cold
Tonsillitis
Sore throat
Hay fever
Bronchitis
Bronchial asthma

Disorders of the Eyes

Acute conjunctivitis
Myopia in children
Cataracts without complications
Central retinitis

Mental-Emotional Disorders

Anxiety
Depression
Stress
Insomnia
Addictions
Weight control

Musculo-skeletal Disorders

Frozen shoulder, Tennis elbow
Low back pain
Osteoarthritis and joint pains
Stiff neck
Tendinitis
Bursitis
Sprains
Injuries from auto accidents
Chronic fatigue syndrome
Fibromyalgia

Gastro-intestinal Disorders

Acute and chronic gastritis
Hyperacidity
Hiccoughs
Acute uncomplicated duodenal ulcer
Chronic duodenal ulcer (pain relief)
Acute and chronic colitis
Acute bacillary dysentery
Constipation
Diarrhea
Paralytic ileus

Neurological Disorders

Headache and Migraine
Dizziness
Trigeminal neuralgia
Facial palsy (within 3-6 months)
Pareses following stroke
Peripheral neuropathies
Meniere's disease
Neurogenic bladder dysfunction
Nocturnal enuresis
Intercostal neuralgia
Sciatica

Disorders of the Mouth

Toothache
Post extraction pain
Gingivitis
Acute and chronic pharyngitis

Ear Disorders

Ringling in ears
Deafness
Meniere's disease
Earache

Reproductive System Disorders

Infertility
Premenstrual syndrome (PMS)
Irregular menses
Menstrual cramps
Pelvic inflammatory disease (PID)
Menopausal symptoms
Morning sickness
Urinary incontinence
Impotence

How widely is Oriental Medicine being used in the U.S.?

In the United States, the use of Oriental medicine is gaining widespread acceptance, with more than 17,000 certified and/or licensed practitioners.

Are Oriental medicine and other complementary and alternative medicine programs being used in hospitals as well?

The 2007 American Hospital Association's Health Forum Complementary and Alternative Medicine (CAM) Survey of Hospitals found that 35 percent of the hospitals offering CAM provide acupuncture as an outpatient service to their patients. Additionally, acupuncture is represented as one of the top six modalities in both outpatient and inpatient settings amongst those hospitals. ⁷

Identifying a Qualified Oriental Medicine Practitioner

How do I find a qualified Oriental Medicine practitioner?

Look for a Diplomate of Oriental Medicine (NCCAOM)[®] or a Diplomate holding one or more other NCCAOM certifications through the NCCAOM[®] *Find a Practitioner* search engine at www.nccaom.org.

The additional designation of licensed acupuncturist (L.Ac.) is awarded by a state regulatory board. Currently, 43 states plus the the District of Columbia, require NCCAOM certification or the passing of the NCCAOM examination(s) as one requirement for a state license to practice Acupuncture and/or Oriental medicine; however, one should always confirm the practitioner has a current state license to practice with the appropriate state board.

What training does a NCCAOM Diplomate of Oriental Medicine have?

A Diplomate of Oriental Medicine (NCCAOM)[®] has completed four academic years of education at the master's degree level in an acupuncture and Chinese herbology program accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM) or has completed an international education program which is substantially equivalent to ACAOM standards. ACAOM is the only accrediting body recognized by the United States Department of Education as the authority for quality education and training in acupuncture and Oriental medicine. In addition to graduation from an ACAOM accredited program, a Diplomate of Oriental Medicine (NCCAOM)[®] must demonstrate professional competency by passing NCCAOM certification examinations in Foundations of Oriental Medicine, Acupuncture and Point Location, Chinese Herbology, and Biomedicine as well as meet other NCCAOM certification requirements. Generally, the NCCAOM Diplomate training and competency verification is in sharp contrast to the acupuncture training of other healthcare professionals such as chiropractors or registered nurses or even medical doctors who typically receive 100-300 hours of abbreviated training.⁵ Certified (and licensed) acupuncturists and Oriental medicine practitioners are also trained in standard medical history gathering, safety, ethics, common pharmaceuticals and supplements, and recognition of when to refer patients to other healthcare professionals or consult with other medical practitioners.

NCCAOM and its Diplomates

The National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM®) is widely accepted as the most influential leader in the field of acupuncture and Oriental medicine. There are currently over 17,000 active NCCAOM Diplomates (NCCAOM certificate holders) practicing under an NCCAOM certification.

The NCCAOM, established in 1982, is a non-profit organization whose mission is to establish, assess, and promote recognized standards of competence and safety in acupuncture and Oriental medicine for the protection and benefit of the public. NCCAOM Acupuncture, Oriental Medicine and Chinese Herbology certification programs are accredited by the National Commission for Certifying Agencies (NCCA). NCCA's standards exceed the requirements set forth by the American Psychological Association and the United States Employment Opportunity Commission. As a requirement of accreditation the NCCAOM must submit annual reports to NCCA and must undergo a full reaccreditation every five years for each of its NCCA accredited programs. Additional information is available at <http://www.credentialingexcellence.org>.

Below are the service marks for the NCCAOM Certification Programs. The highlighted service mark is for the Oriental Medicine Certification Program.

The NCCAOM Diplomat of Acupuncture, Chinese Herbology, and Oriental Medicine programs carry the NCCA accreditation seal.
