

MEDI  HERB®

Go beyond

It's in your nature

# The Birth of MediHerb®

MediHerb® was co-founded in 1986 by Professor Kerry Bone and born out of his desire for efficacious herbal products.

Inventing a unique extraction method for herbal liquids which guarantees validation of species and plant parts while preserving the full phytochemical spectrum of the herb, it was the beginning of high-quality herbal products. And for over 30 years now, MediHerb has pioneered herbal supplement research and development.

# Our Commitment

Our founder's commitment to high-quality products continues to underpin every aspect of MediHerb.

- ✓ Raw material sourcing
- ✓ Manufacturing
- ✓ Quality assurance
- ✓ Research
- ✓ Commitment to practitioners

## Professor Kerry Bone

Kerry is recognized internationally as a pre-eminent herbal practitioner, scientist and academic with a reputation cemented by his significant contribution to excellence in education, research and advocacy.

- Director of Research and Development with over 30 years of clinical experience
- Author of six books and contributor to over 100 articles on herbal knowledge including peer-reviewed journals

## Our Herbal Sourcing

High-quality herbal supplements begin with sourcing quality herbs worldwide. Our long-term relationships with reputable growers ensure we always obtain optimal and quality materials to provide the patient outcome you are seeking. This includes assisting with:

- Varietal selection
- Climatic and soil requirements
- Time and techniques of harvest
- Drying parameters
- Storage requirements

We rigorously source and test all raw materials and undertake in-depth research to ensure the best herb active constituents and clinically relevant applications. Our manufacturing and extraction processes are revolutionary.

A close-up photograph of a person wearing a white lab coat, holding a yellow flower in their hand. The background is a lush garden with green foliage and other flowers. The image is partially obscured by a white circular graphic element on the left side.

## Our Quality Assurance

MediHerb's commitment to quality governs all aspects from sourcing to bottle to ensure your patients have the most optimal herbal extracts in the world.

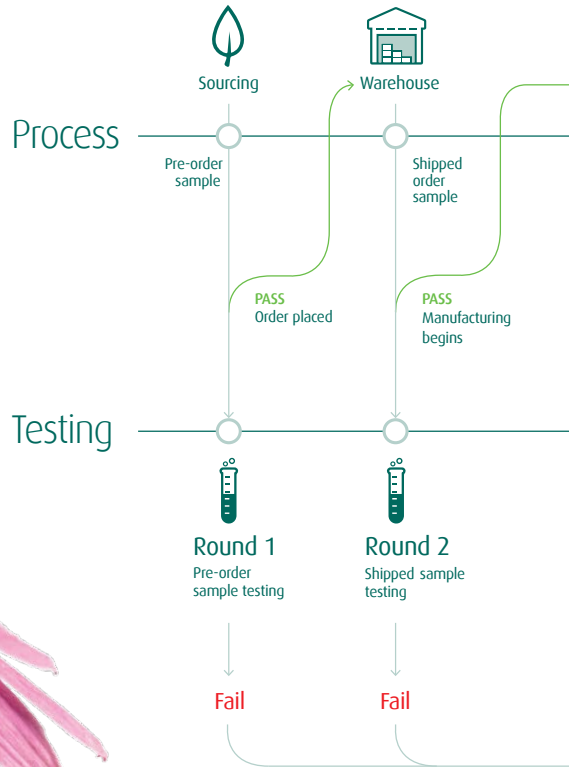

- ✓ Our quality incorporates pharmaceutical-standard manufacturing
- ✓ Testing - identity and DNA testing of raw material supply
- ✓ Finished good testing and monitoring

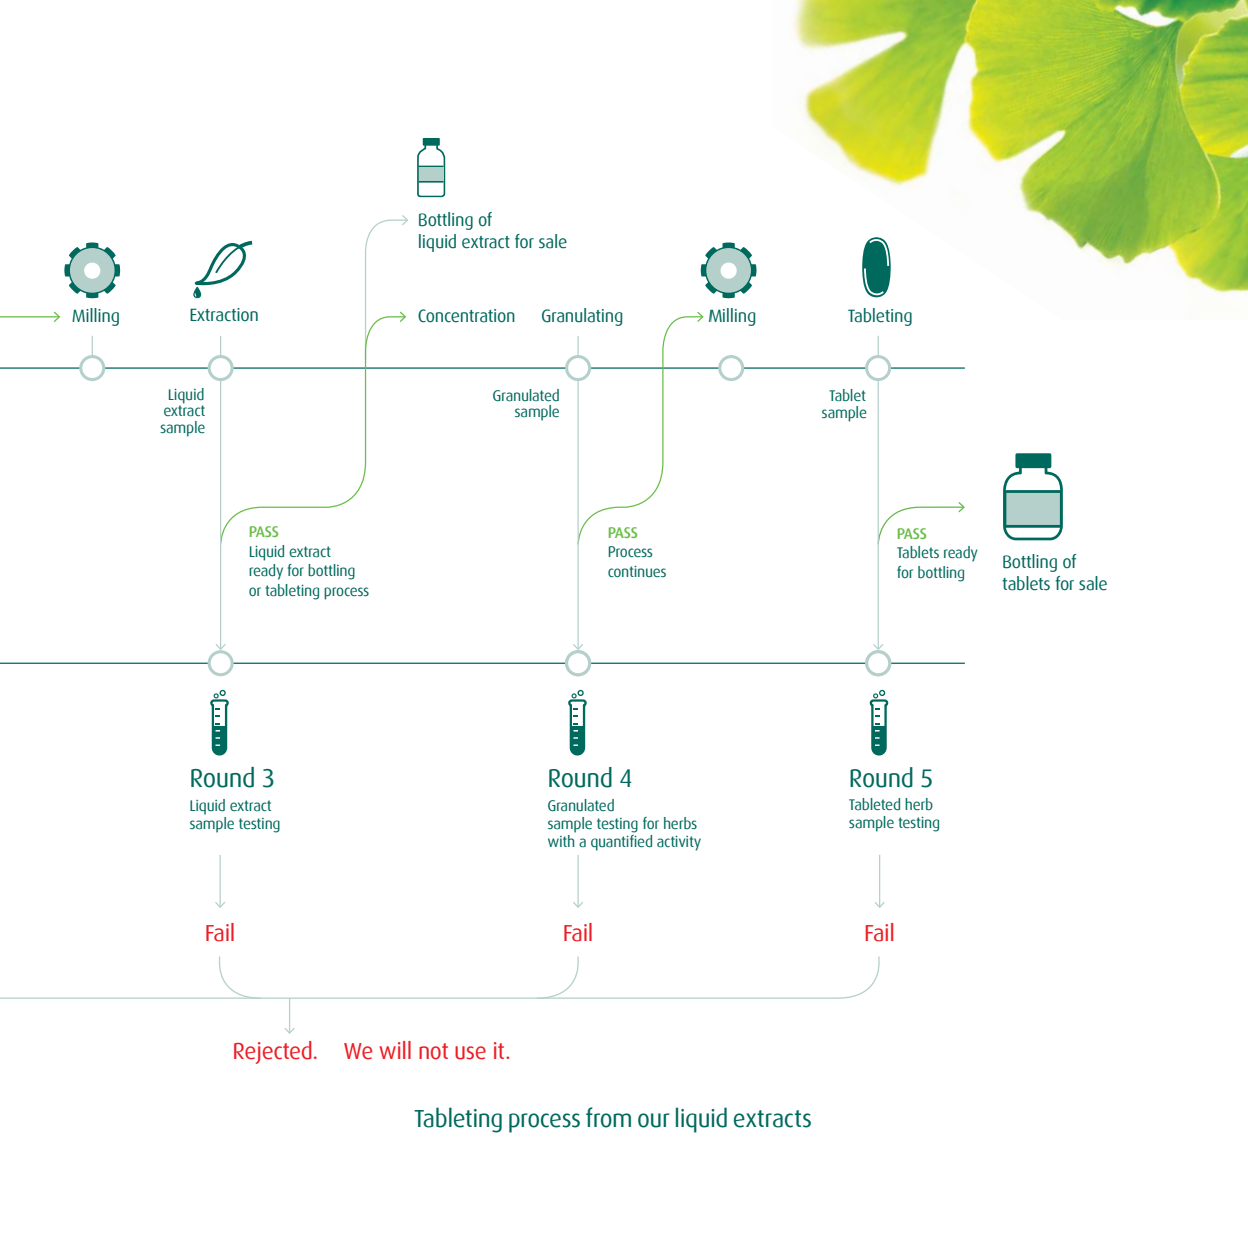

# Our Approach

Our manufacturing and testing process – from sourcing to finished product guarantees the quality of our products.

# Our Unique Extraction Process

MediHerb utilizes a seven-day slow drip **1:2 Cold Percolation** technology which utilizes:

- No heat
- No chemical solvents
- The full spectrum of phytochemicals and guaranteed minimum levels of active constituents

## Our Research

MediHerb is a global leader in herbal scientific knowledge, often collaborating on research projects with reputable establishments worldwide. Our outstanding team of qualified professors, naturopaths and scientists ensure each product is of the highest quality.

- Over 20 clinical trials have been supported by MediHerb

## Commitment to Practitioners

MediHerb was established by practitioners for practitioners and for the last 30 years we have been passionate about investing in the future of natural medicine and delivering innovative health care solutions that provide the healing wisdom that patients are seeking.

We will continue to facilitate mainstream acceptance of the professional natural medicine industry as a significant contributor to health globally. We are excited about the discoveries to come, advancing knowledge and excellence through the latest scientific evidence and centuries of traditional wisdom.
