| VF Hemp Oil (A3040, 30 mL) | Days Until Refill Needed | 240 | 120 | 60 | 40 |

Targeted Nutrition for Cats | Dogs | Horses

Feline Formulas

Since cats are obligate carnivores, our feline formulas contain fewer ingredients than our canine formulas and focus more on specialized protein extracts. These ingredient combinations provide a wide range of nutrients to support multiple body systems.

Canine Formulas

Dogs are omnivores, which is why our canine formulas contain a variety of ingredients that include a balance of animal tissues and botanical materials. These ingredient combinations provide a spectrum of nutrients to support multiple body systems.

Equine Formulas

Our equine formulas contain ingredients such as vegetables, herbs, and fruits to deliver a full spectrum of phytonutrients, enzymes, minerals, and vitamins. Safe and effective, these formulas were developed to target the nutritional demands of specific equine systems.

The Great Majority

of the raw plant ingredients we use in our supplements are grown on our organic farm

Freshly Harvested

Crops are always harvested and processed within the same day

Our team performs as many as **2,000 quality tests** each week

Nutrition Innovation Center

Our first-of-its-kind research center in Kannapolis, NC
