

SIV™

TINY BACTERIA. BIG DEAL.®

FOR SERUM USERS - SHAKE VIGOROUSLY BEFORE EACH USE

DIRECTIONS

Apply 1-3 drops once daily. Pat into dry or damp skin. Apply after cleansing or toning.

NATURAL SETTLING & CLUMPING ARE EXPECTED

Our serum is intentionally formulated without fillers or suspension agents. Because of this, natural settling and clumps are expected. You may notice small white or beige particles - these are simply the carriers for the bacterial strains. As the serum is used, these particles become more uniform and form a fine beige sediment at the bottom.

HOW TO USE

Shake vigorously until the sediment is fully dispersed into the liquid. Apply as usual - any visible particles melt into the skin. Once the bottle is set down, the ingredients will naturally settle again. This is perfectly normal. Simply shake before **each application**.
